

SCIENTIFICALLY PROVEN

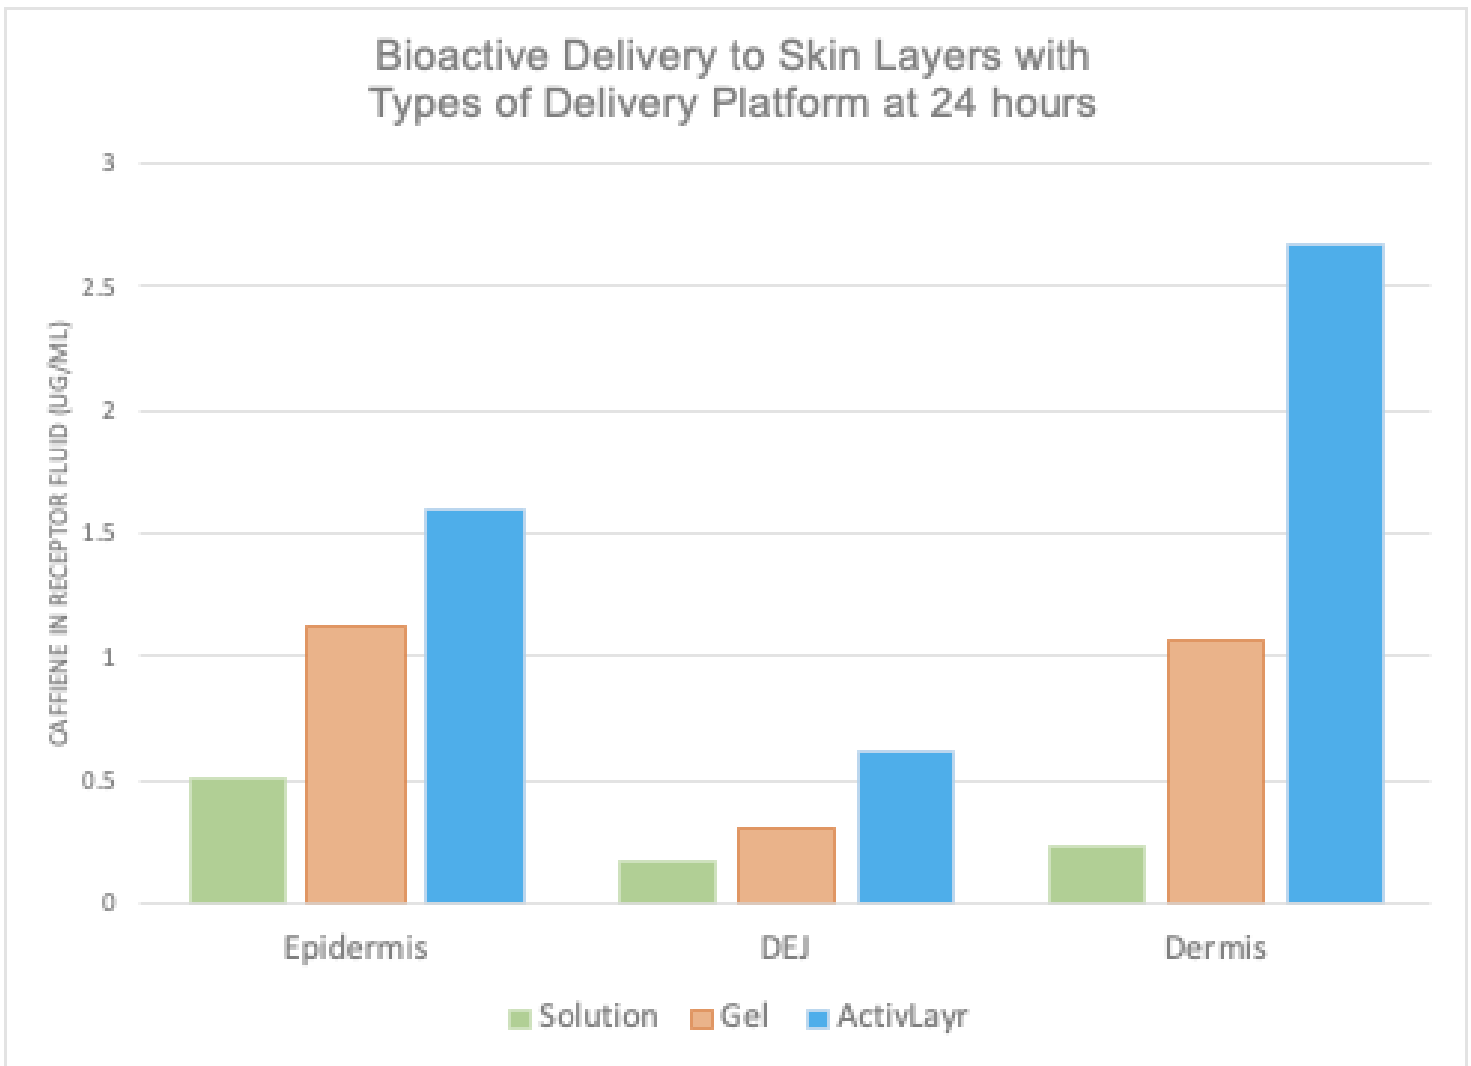

ActivLayr™ patch outperform its penetration rate on both solution (similar to your eye serum and cream) & gel alcohol-based product (i.e. hydrogel eye mask).

10 times

deeper penetration rate than solution-based

150% more

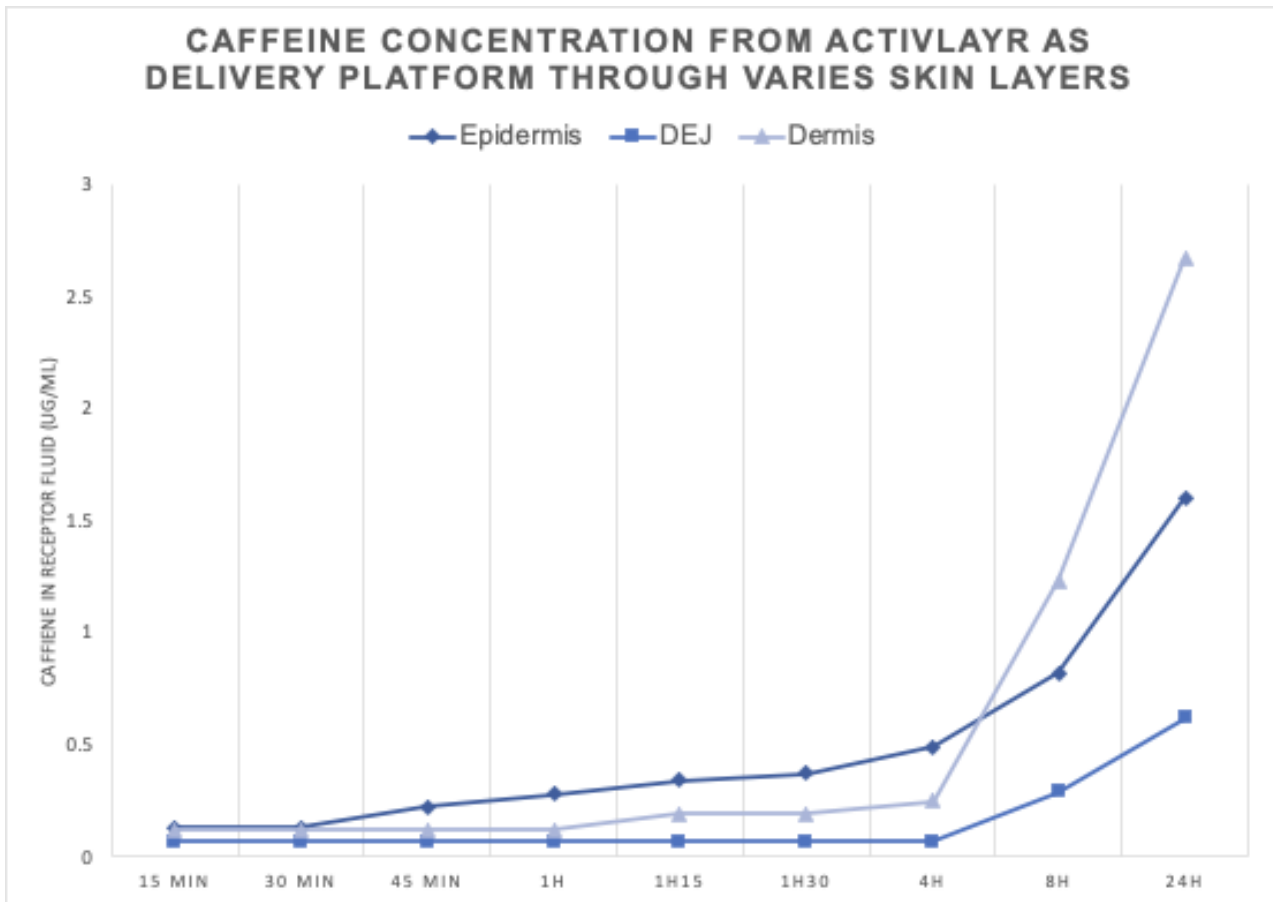

effective to delivery active into the dermal skin than gel-based

The results above clearly show that at 24 hour, ActivLayr has the ability to deliver active deep to the dermis layer of the skin. This sustainable release of active has up to **10 times deeper** penetration rate than your regular eye serum and cream, in this case, solution alcohol-based product. While **gel alcohol-based product** is up to **150% more** effective to delivery actives into the dermis.

*skin thickness may varies person to person.
Please contact hello@activlayr.com for more detailed info

SCIENTIFICALLY PROVEN

*skin thickness may varies person to person.

At 15min, ActivLayer™ has the ability to deliver actives into the *epidermis layer** of skin, breaking the barrier of stratum corneum and providing sustainable release for up to 4 hours. ActivLayer™ has a great result with an exponential release of bioactives up to 24 hours at a concentration of 1.6ug/ml. ActivLayer™ then continues to deliver bioactives past the dermal-epidermal junction (DEJ) and dermis layer of the skin, where bioactives really work.

The continuity of penetration has scientifically and clinically proven that ActivLayer as *the ideal delivery platform for actives to your skin*.
